BE SMART TOO

[ADRIANsmart](#) has another big industrial user. DOMETIC SLOVAKIA from Fil'akovo, Slovakia, decided to replace all classic room thermostats and replaced them with [ADRIANsmart](#) controls for [hot air gas blowers](#). A total of 20 control units were revived by our technicians and trained operators. By individually setting each zone and unique temperature and time regimes, perfect circumstances are created for complete control over heating and significant energy savings. Use via mobile phone or PC and a password system contribute to a convenient and secure way of control.

NEW INSTALLATION VAMAR

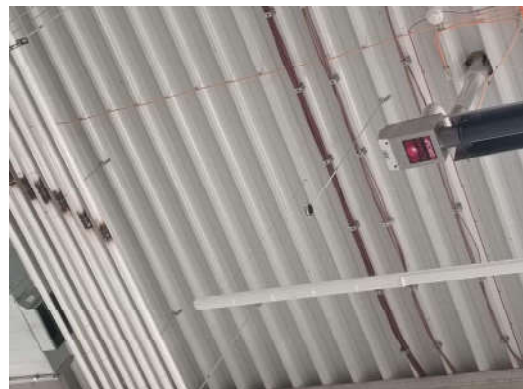

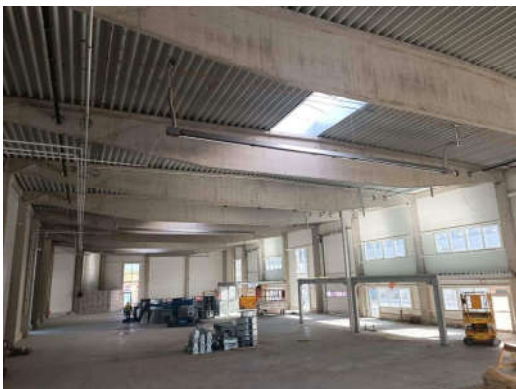

In the first stage, we delivered 4 units of [ADRIAN-AIR AX80](#) hot air gas blowers to the reconstructed welding hall, and another 4 units should follow soon after. On the contrary, the original super dark infrared emitters, which were not a suitable solution, are being dismantled. As part of good cooperation, we ensured installation supervision and operator training directly on site by our colleagues.

METROSTAV AND ADRIAN GROUP CONTINUE TO COOPERATE

The latest stage of the BORY II construction is finished and the other 4 halls have installed dark gas infrared heaters [ADRIAN-RAD AL352 and AL132](#). A total of 32 appliances are designed so that the premises can be rented to different customers with different requirements, and at the same time ensure that everyone has a guaranteed temperature comfort. We installed appliances and chimney paths on these buildings. With proper coordination and cooperation, even constructions of this scale can be realized smoothly and efficiently.

SONNIGER INNOVATIONS

In 2023, all [HEATER CONDENS CR ONE, CR1, CR2 and CR3](#) hot water units will also be available in a variant with EC fans. Energy-saving fans with a high-quality modulation system bring a much-needed reduction in consumption. More great news come from range of controllers. [The Panel Intelligent](#) can be controlled wirelessly via the app. [The Panel Comfort](#) enables real switching off and on of the heating in the [GUARD and GUARD PRO](#) door curtains. For hot water blowers with EC fans, [the SPLITTER](#) can control up to 10 devices together instead of 6 units. All the news are already available on our [e-shop](#). GENERAL ASSEMBLY OF ZSP SR

The General Assembly of the Slovak Engineering Industry Association was held on December 2, 2022 in the Saffron Hotel, Bratislava, where the members got acquainted with the activities of the ZSP SR for the past period, the current status and the range of proposed activities. The participants exchanged opinions and experiences on how to face several current crises, which in a very short sequence affected not only the industrial segment of the Slovak Republic, but across the country and the world. ADRIAN GROUP participated in the meeting and was elected to the head of the election commission.

AN UNUSUAL GIFT

You don't need to convince anyone about the need to protect yourself from bacteria and viruses. We all wish our loved ones good health for the holidays, especially in this difficult time. Christmas is just around the corner and the rush to buy gifts is at its peak. Give them more care about their health this Christmas, protect them from the coronavirus and other harmful substances. We are currently distributing the unique [NOMÁD](#) and [AERIASHIELD](#) decontamination devices to hospitals, offices, and households, so don't hesitate to take advantage of this unique opportunity.

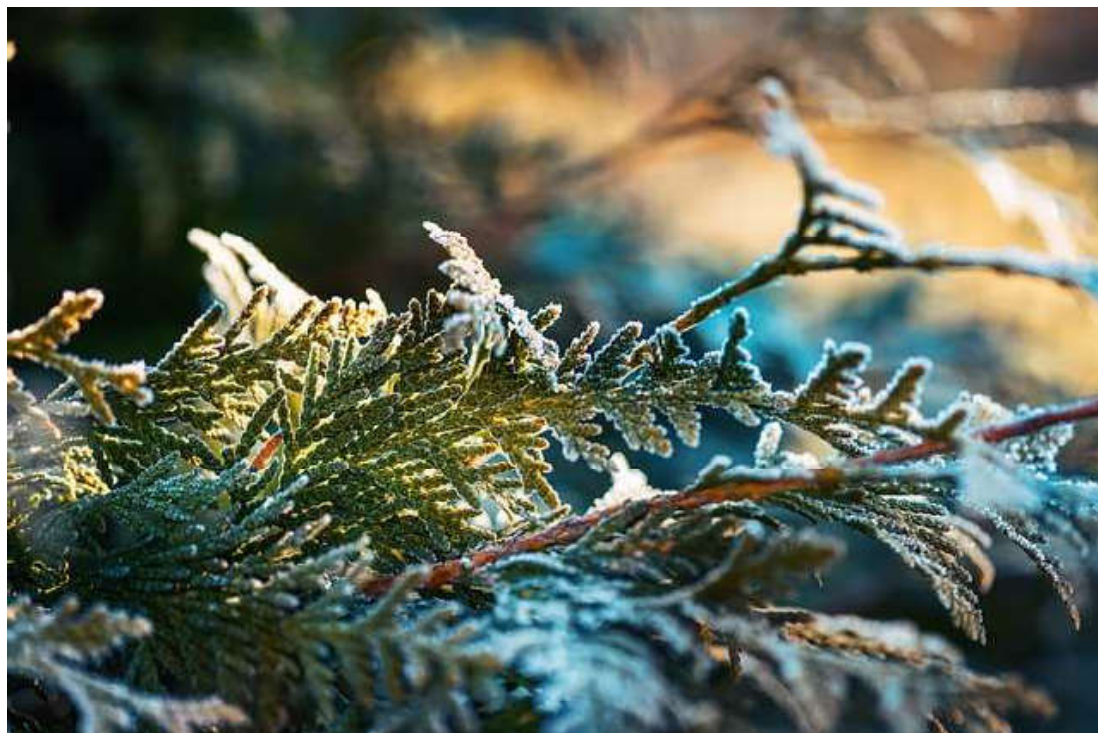

BENEFIT EVENT OSMIDIV

It is always nice when someone thanks you. And even more when it comes to handicapped people and especially children who don't have sometimes that many joys in life. We supported a benefit event for people with disabilities from the Banská Bystrica county "Osmidiv". It is beautiful that we can at least make their experiences more pleasant in this way, because everyone has the right to joy.
