NEW REFERENCE SNICO

A well-known producer of food and especially the popular ketchup and mustard SNICO in Liptovský Mikuláš was disconnected from the original source of steam and hot water this year and had to urgently deal with a different type of heating. After months of consultations with [ADRIAN GROUP](#) and other experts, they decided on propane hot air heating. Despite the size of the objects and their clearance height, hot air heating is more suitable especially in warehouses, since most products are stored in glass and plastic and pallets are stacked high. 15 units of [ADRIAN-AIR AX45](#) heat several buildings with different purpose and are connected to large-volume propane storage tanks located in the area.

NEW REFERENCE STK MALACKY

In September, ADRIAN GROUP delivered hot water blowers [HEATER CONDENS CR ONE](#) to vehicle technical control station in Malacky for our partner Kalorim s. r. o. These heaters are highly efficient even when connected to low-temperature water supply, which makes it possible to connect them to condensing boilers or heat pumps. That was also the case here. We are glad that we contributed to an economical solution and made the working environment more pleasant for the employees.

ALTERNATIVE IN ELECTRIC HEATING

environments and with protection up to IP44, as well as for not completely closed objects or spaces with higher humidity. We recommend [ADRIAN-RAD ELECTRO P](#) for lower spaces, where aesthetics is also important. They are popular in stores, exhibition spaces, offices as well as churches. Warm air electric heaters [ADRIAN-AIR ELECTRO](#) are universal and, with two-stage performance, also very economical. Installations of these energy-saving appliances are typical for their simplicity. It is also relatively easy to draw them into the existing project documentation. The latest hits are the [GUARD and GUARD PRO](#) air curtains, which are available in versions with electric and hot water heating or without heating. They are efficient and affordable. PREPARE YOUR COOLING UNITS FOR WINTER

With the arrival of cold days and especially nights, it is time to think about winterizing your [evaporation units](#) so that working comfort for employees during the summer heat is ensured for as long as possible. Summer will definitely come one day, so don't let the first autumn frosts damage the equipment by freezing water residues in pipes, tanks or filters. It's not complicated! The relatively simple design of the cooler allows you to activate the automatic cleaning function yourself and then drain the water from the device's tank. After disconnecting the device from the water supply, it is necessary to dry and clean the filters and protective nets. Do not use alcohol or wire brush to clean the inside and outside of the box. We recommend disconnecting the device from the power supply. The [cover sleeve for ADRIAN-AIR EV](#) is an ideal solution for covering the device after draining and cleaning. The cover will protect the unit from the weather, rain, snow, frost and also insects and little animals trying to hide from the winter. Sleeves are available with holes for top, bottom and side exhaust from the device. Are you tired of worrying about the maintenance and don't have time or desire to do it yourself? Order professional services from us! If you are interested, we can provide the service together with sleeves. Consider installing a [UV-C lamp](#) for the next season, which serves as a water sterilizer and effectively protects against bacteria, viruses, parasites, algae and other unwanted elements of neglected maintenance.

EXHIBITION PLOVDIV, BULGARIA

After two infamous years of downtime, the Bulgarian Fair opened its doors in Plovdiv in mid-September 2022 in beautiful weather. ADRIAN GROUP participated as an exhibitor at the joint national stand of the Slovak Republic under the auspices of the SARIO agency. Throughout the week, we experienced many useful meetings with visitors to our stand as well as representatives of government structures. We participated in B2B negotiations organized by the chambers of commerce and industry of both countries. It was a beautiful and useful end to the summer season.

You can find more photos from the event [here](#).

ISO CERTIFICATION

The latest ISO audit at ADRIAN GROUP from 19/09/2022 reconfirmed the correctness of the company's internal procedures and settings. The focus on quality and on the customer constantly moves us forward and creates room for improvement and innovation. We are proud that quality is part of how our customers perceive the ADRIAN brand.

WE ARE LOOKING FOR A NEW COLLEAGUE

We are looking for a new colleague for our technical team: warranty and post-warranty customer service, work at heights, handling and operation of simple tools, assembly and auxiliary work in the production process. The applicant should be skilled, hardworking, technical type, active driver.

nomad[®] MINUS VIRUS INSIDE

www.nomad-minusvirus.com

ELIMINATES 99,91% CORONAVIRUS IN THE AIR*

IQ capital device, tested by the Institut Pasteur de Lille, eliminates 99,91 % of human coronaviruses HCoV-229E in 7 minutes 30 seconds under laboratory conditions. The human coronavirus HCoV-229E is a different coronavirus but from the same family as the causative agent of COVID-19, SARS-CoV2.
* Sealed enclosure of 1.4 m³ without air renewal.
