ADIABATIC COOLING IN REAL LIFE

Based on success of adiabatic coolers [ADRAIN-AIR EV 18](#) for big tomato farm in Levice, Slovakia the company VÚMZ SK decided to get this natural low-cost cooling for its production facilities in Černík. This way we began a series of August installations. Besides, sales of [mobile coolers EV 8000](#) continue to provide local cooling or improvement of temperature in working areas in for example rented premises where no construction is allowed. Right now, 5 pcs travel to AUTOSTOP INTERIORS d. o. o. in Leskovac, Serbia. This is our long-term customer purchasing new units every year as they expand their production. They successfully combine standard model with mobile ones.

COMBUSTION FANS FOR ADRIAN-RAD A 50

We inform our partners that due to delay of new stocks of fans [1-20-015](#) we will prioritize supply of the fans for new radiant heaters and slow down the sales of fans as a spare part for service and maintenance. This is only temporary, and we believe the situation will get back to normal before the season.

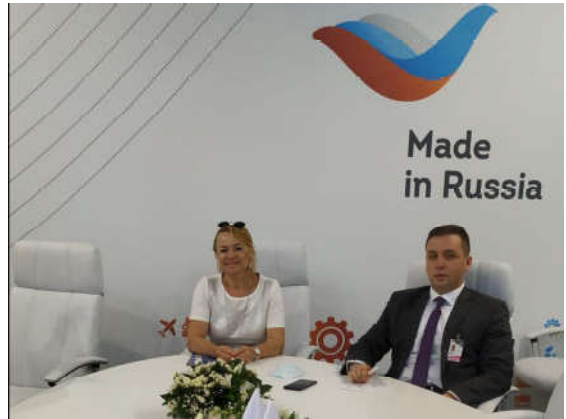

MAKITA SUCCESS STORY

Last year we installed our heaters into newly build official service centre for warranty and non-warranty repairs of MAKITA and MT series in Banská Bystrica – Šalková. In order to get the best result, we combined [hot air gas fired units](#) and [destratificators](#). First season is over, and customer is happy. Total number of units proved to be appropriate and desired temperature was achieved regularly. Mr Cimerman: "We moved into the new premises last autumn November 24th during the heating season. With small adjustments to control system, we now have units that proved to heat and ventilate, and we are happy with it." We remain at their disposition for service and maintenance.

BUSINESS MISSION TO YEKATERINBURG

From July 5th to 8th [ADRIAN GROUP](#) attended business mission to Yekaterinburg organized by SARIO in cooperation with Embassy of Slovak republic in Moscow including exhibition INNOPROM 2021. Program consisted of business meetings and visits to important factories SVEL (producer of complete electronic solutions for technology) and RCLT (laser metal processing, specialized on titan). During these visits Slovak entrepreneurs introduced their capacities and will to cooperate. Chamber of Commerce in Sverdlovsk region (Ural TPP) assisted with the organization as it is one of the strongest industrial and commercial chambers in Russian federation. Other part of the program included the exhibition INNOPROM 2021.

NOMAD FOR CLEAN AIR

We are introducing new product named [NOMAD](#) with antivirus and antibacterial properties tested by Institute Pasteur de Lille. [NOMAD](#) with its ergonomic design works independently. It is highly effective in interior on maximum space of 15 m². This way it presents perfect protection for your office, living room, bedroom etc. Technology is based on discharges of energy on dielectric barrier. It does not use any chemicals, nor it does not produce anything toxic. Electrode is supplied by high intensity electric supply and controlled discharges influencing the ambient air and creating cold plasma of ions. Produced anions and free radicals have approved antivirus and antibacterial effect. It destroys smells, influence olfactory organs of mosquitos, and disorient them. [NOMAD](#) eliminates 99,91 % of human coronavirus HCoV-229E in laboratory conditions within 7,5 minutes*. Human Covid virus used for testing is from the same virus family as SARS-CoV-19 that causes COVID-19.

*1,4 m3 sealed space without air exchange
