NEW RANGE OF HOT AIR HEATERS

New requirements of ECOdesign and ERP norms resulted in creating new range of hot air gas fired units. With new legislation coming to force there will be a complete new sortiment of hot air heaters and condensing appliances. Step by step we will bring more details about new units for vertical blowing and condensing ones as well. Stay tuned for more and do not miss on more information for future options.

BIOLOGICAL WASTE NEEDS HEATING TOO

Global pandemic situation causes among other problems extreme production of waste and dangerous waste, too. To dispose this biological load our customer, Ekosolid Slovakia s.r.o., opened new premises in Bošany. The use of oil combustion opens door to hot water solutions. Implementation of [HEATER 1](#) guarantees stable +16°C in the building which is necessary for technology to run smoothly. Control system operates these units according to set temperature and it regulates fans speed automatically to save energy costs.
