SERVICE PARTNERS' TRAINING

After difficult pandemic times we managed to organize series of 8 trainings for our service partners. Up to 30 people attended to learn about changes in our range and effects of new norms for EcoDesign and ERP. All attendees appreciated the added value of the training course. By the end of July, we plan to schedule an extra training day for those who were not able to attend so far. Precise date and time will be announced in advance. Future training days will depend on COVID situation and feedback of interest from you.

WHAT IS THE ENERGY CONSUMPTION OF EVAPORATIVE COOLING?

Evaporative cooling is getting really popular nowadays as it improves working conditions in your premises even at high summer heat. In comparison to standard A/C the investment is lower. However,

[Subscribe](#)[Past Issues](#)[Translat](#)

finished at 4:15 pm with 33°C. During 7,5 hours the evaporative cooler [ADRIAN-AIR EV18](#) consumed 10,5 l of water only. The unit was set to minimum air flow. Maximum difference between temperature of air on the inlet and outlet was 8°C. This was measured at 60 cm distance from blowing opening. Consumption of electric power never exceeded 1 kWh. Surely, with higher air flow or different temperatures and relative humidity, the results will vary, however this can serve well as an example upon which we can declare that evaporative cooling operation is a highly economical way to cool your premises and survive summer heat.

ELBA – EVAPORATIVE COOLING INSTALLATION

Engineering company ELBA a. s. from Kremnica, Slovakia decided to expand their existing evaporative cooling system. In the past they had already [ADRIAN-AIR EV](#) coolers installed in selected premises. Based on their experience and satisfaction with performance and low-cost operation they decided to add new units into yet another workshop and maintenance hall. Straight from the moment of setting into operation the effect was obvious. And yet we are already working out a new solution for another building. Satisfaction of the customer is the best reference.

SCHILLER – TESTING MODIFIED ADRIAN-AIR EV INTO MOBILE VERSION

Are you suffering from heat, and you are not sure about the best way to deal with it? Rent our mobile modification of [ADRIAN-AIR EV18](#) and test it in your own premises. Once you decide to purchase evaporative cooling, the rent is free of charge. Company Schiller s.r.o. chose to test it this way and they did daily measurements of temperature and humidity. After a week they wrote: „We are cooling with your unit. Workers are happy and effect is obvious. Temperature drops by 4°C regularly “. The effect would be even better shall the unit get the air intake from the outside. Now potential customer knows what to expect as bare minimum and he shall make an easy decision soon. Find more about terms of rent on our [website](#) or [e-shop](#).

Recreational resort PREDNÁ HORA uses our mobile evaporative coolers [ADRIAN-AIR EV 5000](#) for some years already. They focus cooling in the restaurant and they are happy how they dealt with excess heat at minimum costs. Now, due to COVID, the main concern is safety. Therefore, they purchased several units of [MOSKITOFREE](#). This tiny machine cleans space of 15 m² to make it free from coronaviruses, bacteria, and other dangerous elements to make your closest surrounding safer. Besides these crucial features it protects you from mosquitos without killing them because we all know that the nature needs them, and we must be environmentally responsible. Units are placed in areas where there is the most frequent contact between staff and visitors such is reception and bar. This way everybody is safe. We are happy to help.

INVITATION TO EXHIBITIONS
