USE OF ELECTRIC HEATING IN WHOLESALE AND WAREHOUSES

Yet another customer, big wholesale company for installers in heating, cooling and ventilation EMPIRIA here in Banská Bystrica is happy to use our solution. In their large warehouse with cashiers and customers picking up their orders local need for heating was requested. By applying electric heaters [ADRIAN-RAD ELECTRO Q4500](#) and door curtain [GUARD 200E](#) we provided necessary comfort for both employees and customers in and around cash and carry zones without the need to heat the entire large building.

BEEWAIR TECHNOLOGY

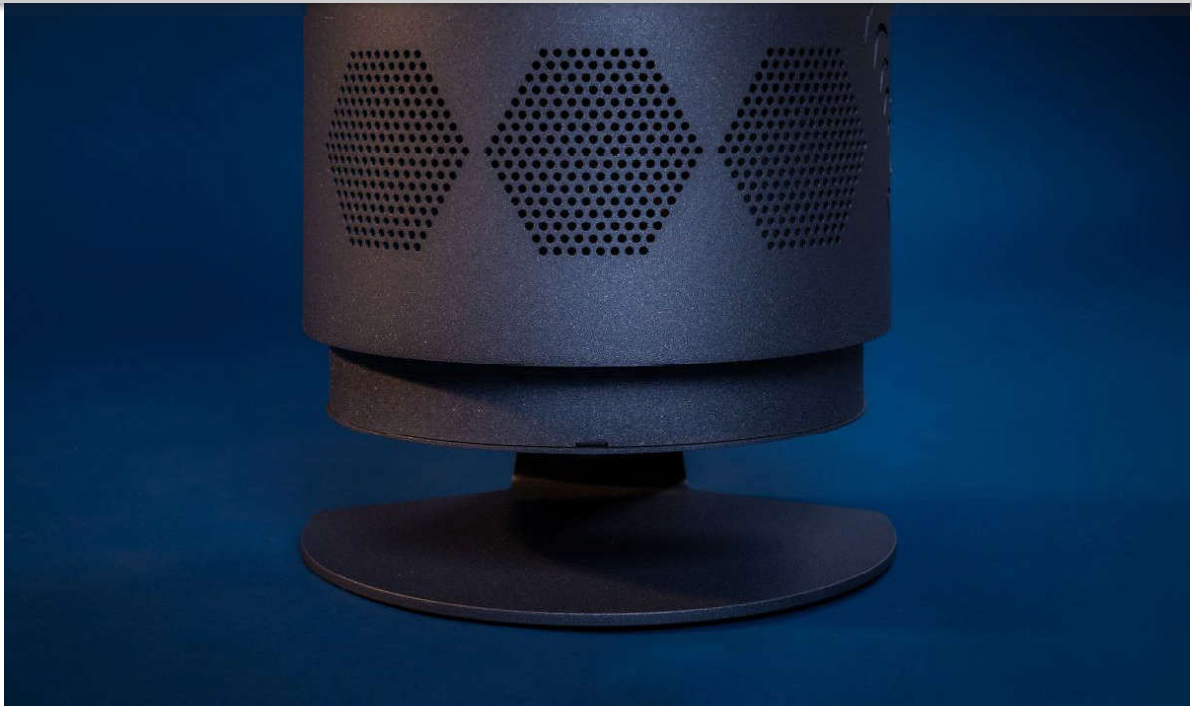

What is the main difference between **BEEWAIR** and air cleaners in terms of filters? **BEEWAIR** does not have any!!! Our goal is not to create yet another secondary pollution and contamination. Why would we want to create more waste, dangerous waste by the way. **BEEWAIR** does not clean the air. It decontaminates it. Replaces the original air by new. It is the only technology to use contaminated air to create new air. There are natural processes in controlled environment applied here such as cold plasma and mineralisation – transformation of molecules. Contaminants are taken apart like box of bricks and used as fuel for production of new molecules ready for us to breathe safely.
