friendly energy system management. Thanks to our free application, you can use your smartphone or any other appliance connected to the Internet to operate it. It displays all

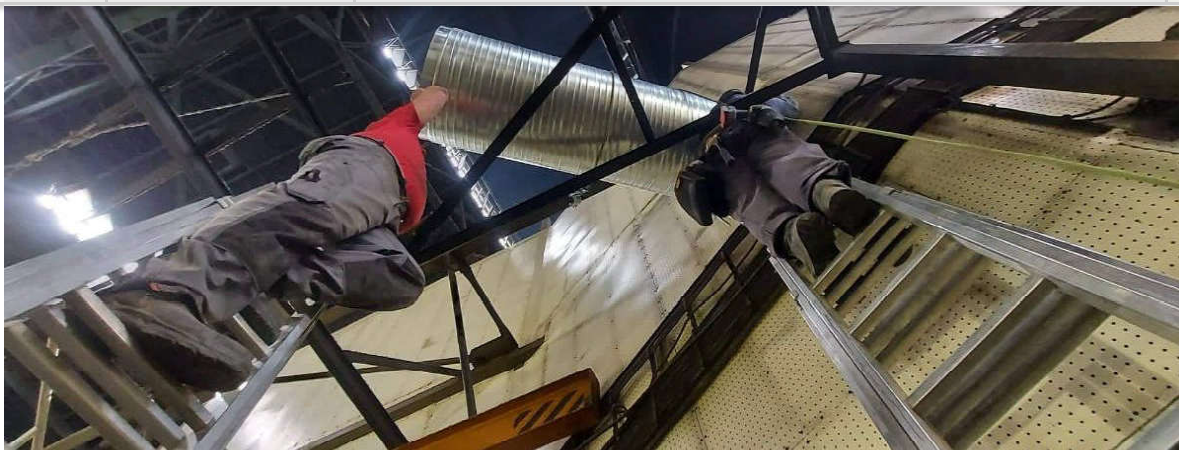

necessary data and offers all desired functions. Right now is a perfect opportunity to get hold of ADRIAN SMART MULTI with a special discount. Order it [here](#) or visit our [e-shop](#).

HOW DO YOU PLAN TO COOL YOUR PREMISES?

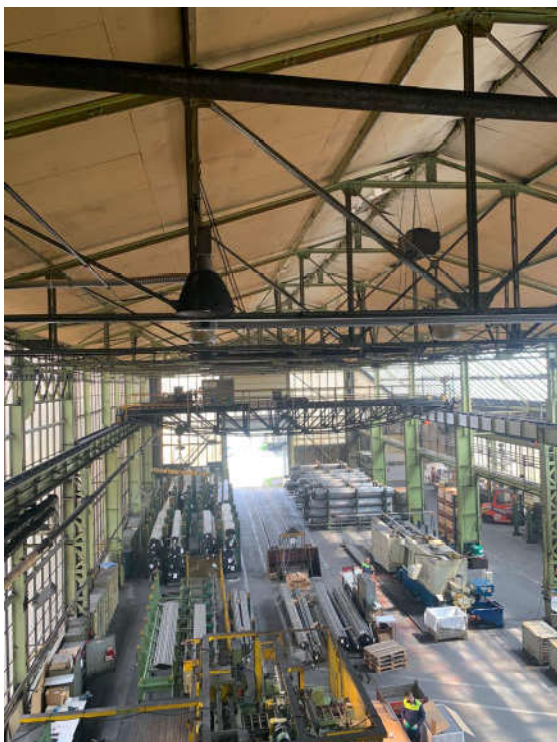

The spring is almost over. Even though the weather has been quite cold so far, it is the best time to start thinking about your cooling for summer. Did you know air conditioning is a potential source of trouble? It dries the air significantly and there is a high risk of air contamination. These issues may be avoided by using [evaporative coolers](#). Only fresh air cooled naturally by water will get inside. Plus, operation of adiabatic cooling is ten times cheaper than air conditioning. However, the best part is the environmental friendliness of the technology. Check out more information on our [e-shop](#).

REPLACING INFRARED HEATERS WITH ADRIAN-RAD

We have a long term cooperation with Železiarne Podbrezová. Besides installing dark infrared heaters [ADRIAN-RAD](#), hot air units [ADRIAN-AIR](#) and [control systems](#) we provide complex service and maintenance. In some of the halls, original heaters of other brands still exist. We take care of those, too. In order to improve performance of energy system we began to replace these heaters with [ADRIAN](#) products. Our aim was to eliminate increasing costs for repairs and forced outages. By having **all** heaters of one brand we make the job of service personnel easier and more effective. Decrease in costs for operation and maintenance creates money savings for the investor. These reserves may be then used again for further improvements and replacements.

NEW HANGING SYSTEM

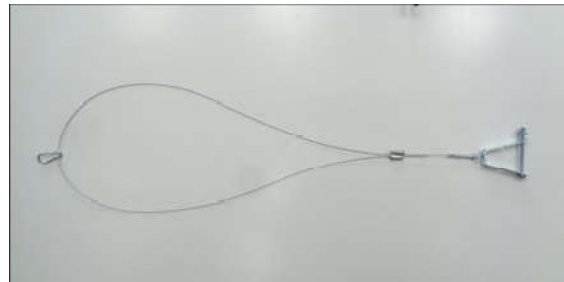

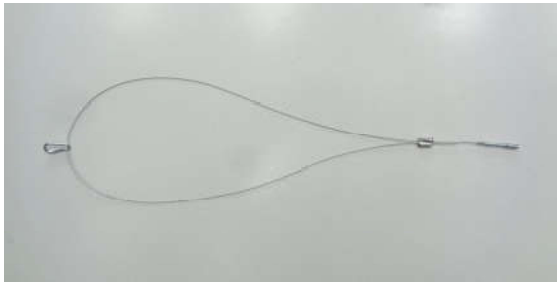

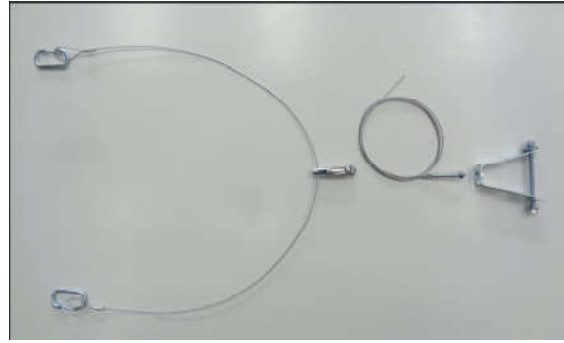

We added hanging systems to new accessories for you. Unique order code contains **all** necessary
