NEW REFERENCE LEADER GASKET

ADRIAN GROUP supplied gas infrared heaters [ADRIAN-RAD AA352](#) and [ADRIAN-RAD AA502](#) for newly constructed building of LEADER GASKET in Bytča, Slovakia. Company produces industrial gaskets and sealings. General contractor was HANT BA a. s. Installation was performed by our partner R-mont RYŠAVÝ. We managed to completely communicate all details of the installation in advance thanks to well-prepared documentation. The entire realization went well. As the owner of the company, Mr. Jozef Ryšavý, declared himself: „I am happy with the approach and delivery from ADRIAN GROUP s.r.o. They met our conditions and expectations.”

AVOID MISTAKES ON THE INSTALLATION

Installation of gas infrareds and gas hot air heaters is not complicated. However, training is essential. Mistakes that happen during realization may be disastrous. Consequently, the heating system may go into malfunction, or the life span may be shortened. Errors caused by mounting are not even covered by warranty. Specialized training with real products and hints reflecting long term experience will help your work to go fast and be correct. You will save yourself time and money, and your customer will appreciate your professionalism. Take a look at short video from real installation to see what happens when someone does not do his part properly and revisional technician comes to set heaters into operation.

We invite you to our next training for service and maintenance on September 23rd. It is free of charge. A great opportunity to learn about all changes in portfolio of [ADRIAN GROUP](#) and new trends in our segment. Most importantly get to know construction details of new solutions compatible with EcoDesign and ERP requirements. All future trainings will be charged and dates will be available later. Feel free to apply at sales@adrian.sk. Get ready for new season. Location: ADRIAN GROUP s.r.o., Lazovná 53, Banská Bystrica, Slovakia.

Training application

WHAT IS NEW IN AIR CLEANING

New products are added to our segment of decontamination and air cleaning. Now you are able to take your personal protection with you as a neckless or key ring. It will create protection area around you, it will kill bacteria and viruses and it will keep away the insect. It works in the exterior as well. Extra benefit is the elimination of unpleasant smells. Try your new best friends in these difficult times now!
