### SPARE PARTS PRICE LISTS UPDATE

From April 1<sup>st</sup> 2023, the new price lists for ADRIAN GROUP spare parts came into force. In addition to the price update of standard components, new items will also be available for ERP units, produced gradually from 2018, and for ceramic infrared heaters ADRIAN-RAD CRE. Valid prices, new items and other data can also be found on our [eshop.adriangroup.sk](#). Consult with us your present commercial terms and discounts at [sales@adrian.sk](mailto:sales@adrian.sk) or 00421 948 352 067 and make sure you have the latest price lists available.

#### INFRARED HEATERS AND/OR VENTILATORS

Model	Power	Price
ADRIAN-RAD CRE	1000W	1200€
ADRIAN-RAD CRE	1500W	1800€
ADRIAN-RAD CRE	2000W	2400€
ADRIAN-RAD CRE	2500W	3000€
ADRIAN-RAD CRE	3000W	3600€
ADRIAN-RAD CRE	3500W	4200€
ADRIAN-RAD CRE	4000W	4800€
ADRIAN-RAD CRE	4500W	5400€
ADRIAN-RAD CRE	5000W	6000€
ADRIAN-RAD CRE	5500W	6600€
ADRIAN-RAD CRE	6000W	7200€
ADRIAN-RAD CRE	6500W	7800€
ADRIAN-RAD CRE	7000W	8400€
ADRIAN-RAD CRE	7500W	9000€
ADRIAN-RAD CRE	8000W	9600€
ADRIAN-RAD CRE	8500W	10200€
ADRIAN-RAD CRE	9000W	10800€
ADRIAN-RAD CRE	9500W	11400€
ADRIAN-RAD CRE	10000W	12000€

### FOUNDRY IN HRONEC, SLOVAKIA

During March 2023, our technicians carried out regular professional inspections and tests together with service and maintenance at the Foundry in Hronec (Brezno district, Slovakia). It was a very challenging week, both from the point of view of the environment - a huge layers of dust from the production everywhere, and also from the point of view that the operator underestimated the regular service of the heating units in recent years. In such a demanding environment, not only the heating technologies face harsh working conditions, but neglecting the service shortens the life of important components, which even cause the heating to malfunction. The transition season between winter and summer is the ideal time to carry out professional inspections and tests, but also to service the heating units, which will prepare them for trouble-free operation during the next heating season. In the current period, we have enough spare parts at our disposal, and at the same time, the waiting times for performing the necessary work are minimal.

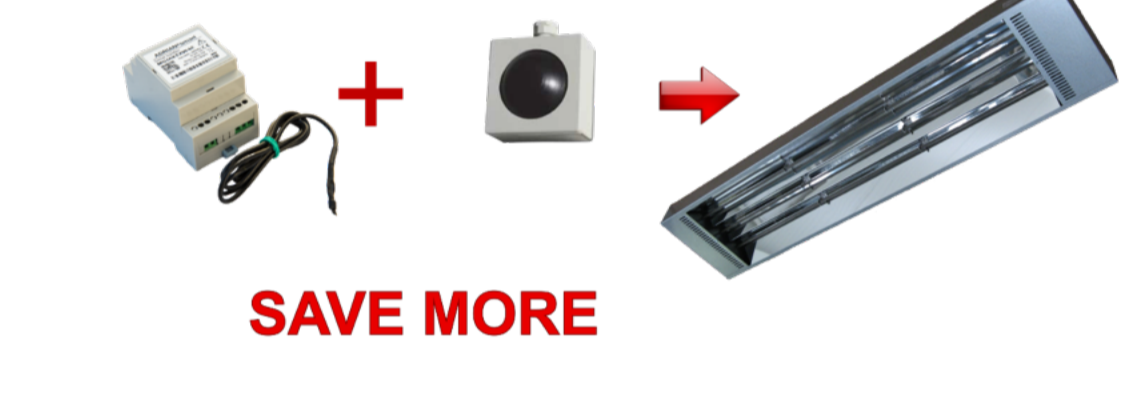

### WE ARE PLANNING THE SUMMER SEASON

The middle of April on the calendar indicates to us that it is time to take care of your cooling units to have them ready to work as optimally as possible during the summer days. We therefore offer you the possibility of performing maintenance and cleaning of all ADRIAN-AIR-LEV cooling devices. If you are interested in maintenance and service, do not hesitate to contact us at [kurjanova@adrian.sk](mailto:kurjanova@adrian.sk) and 00421948 312 270. We will carry out services according to the order and agreed deadline. If you are thinking about ecological air conditioning or need to add additional pieces to the existing nature based cooling system, we will be happy to provide you with an inspection on site, a technical proposal and a price offer. This is how you can solve the problem of excessive heat in your premises in advance, before the summer heat starts.

### INFRARED HEATERS ARE NOW SMART, TOO

With the unique combination of an internal temperature and radiation sensor and a smart wire sensor we have created a unique sensing element suitable for radiant systems. With infrared heating, it is necessary to measure the temperature in the space by combining information about the air temperature and the addition of temperature by radiation. We have the perfect solution for our customers for infrared heaters, both gas and electric. ADRIANsmart is an intelligent smart way to manage things and systems remotely via a mobile phone or other device. Customers normally use it for heating, cooling, ventilation, but also for lighting, watering, opening gates and ramps, etc.

### ADRIAN TRAININGS OF ALL KIND

In March 2023, we started this year's series of trainings of several types. In two terms, we had trainings aimed at servicing ADRIAN heating technologies. The participants learned about the changes in the product range for 2023 and at the same time took a closer look at the design differences between older and new devices that are in line with Ecodesign and ERP requirements. The next training focused on the assembly of the SONNIGER range - hot water units, destratifiers and door curtains, as well as adiabatic cooling. Participants learned about installation requirements for individual technologies, specifics for installation under specific conditions, and errors, often made when mounting appliances, that can even affect the application of the device warranty. The last training session in March was focused mainly on the SONNIGER range for designers. The purpose was not only to show the product range and technical information and news, but also to help with designing. We have introduced a new calculation program on the website, as well as all the technical support that the website contains. We believe that the new information will be helpful for new projects. We hereby invite designers in April for yet another training date, focused on the SONNIGER range, which will take place on 04/25/2023. At this training, you will have the opportunity to meet directly with a representative of the distributor from the Czech Republic, who is ready to answer even the most demanding questions regarding the design of hot water heating, door screens and destratifiers. You can register from now on at [kurjanova@adrian.sk](mailto:kurjanova@adrian.sk) or 00421 948 312 270. We look forward to your participation.

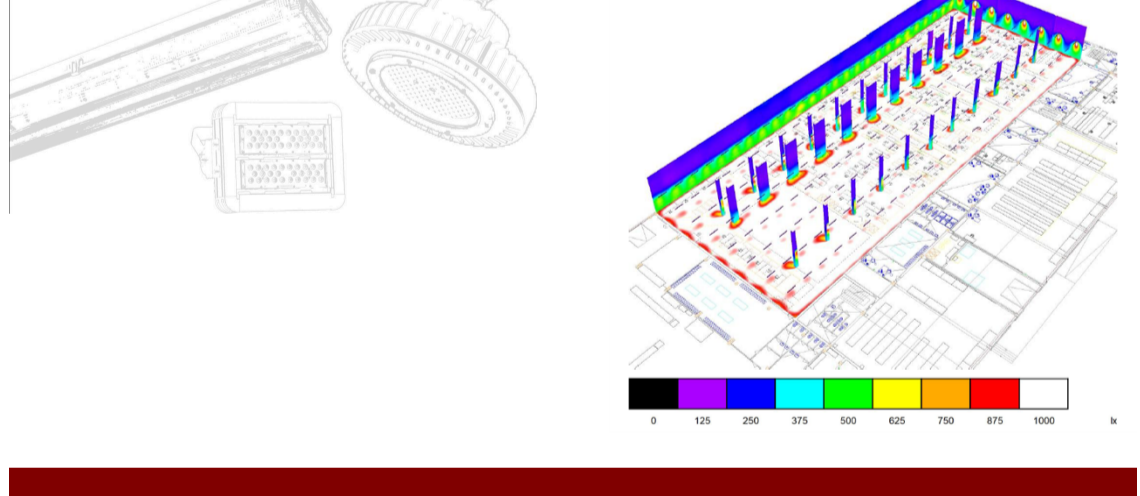

### HVAC EXPO WARSAW 2023

ADRIAN GROUP strives to be as close as possible to its partners and customers. This time we supported our colleagues from HITEXA, Rzeszow in Poland. The common stand was dominated by the topic of cooling with economical and ecological exsorption coolers, where we presented smart mobile solutions as well as large units with a maximum air flow of 18,000 or 30,000 m<sup>3</sup>/h. In addition to cooling, the electric infrared heater ADRIAN-RAD ELECTRO Q and the hot air gas heater ADRIAN-AIR-ERP received the most attention. We thank the partners for the excellent cooperation and presentation and the visitors for their participation.

### SAVE ENERGY ON ALL FRONTS

Saving energy while optimally meeting customer requirements in heating, cooling and ventilation has been our goal for more than 30 years. We realize that energy saving is a much broader topic and acute not only today but especially in the future. In cooperation with another Slovak manufacturer, we are expanding our focus on lighting savings. With a professional and experienced team of experts, we can design and implement an optimal lighting system for our customers and partners that meets customer and legislative requirements and follows current trends. Saving energy saves your finances and the environment. Contact us at [adrian@adrian.sk](mailto:adrian@adrian.sk) and entrust the topic of energy to experts.

### GENERAL ASSEMBLY OF BBRK SŮPK

The general meeting of the members of the Banská Bystrica Regional branch of Slovak Chamber of Commerce and Industry in the 7<sup>th</sup> electoral period 2022-2027 took place in the beautiful premises of the Clocker Hall of the historical town hall of the City of Banská Bystrica. Its present members approved the basic chamber documents - the report on the activities and implementation of the budget for 2022 and the draft budget and activity plan for 2023. In the public part of the general meeting, the chairman of the National Slovak Chamber Peter Mihók and invited guests - the chairman of the Banská Bystrica self-governing region Ondrej Lunter, who addressed all participants and thanked the Chamber for close cooperation and many shared visions, the mayor of Zvolen Vladimír Mařka, the mayor of Lučenec Alexandra Pivková and the representative of the Office of Industrial Property Martin Macko. The guests appreciated the level of cooperation with the regional chamber and outlined its further direction and possibilities. The program continued with the presentation of annual awards to the members of the regional chamber, which was followed by announcing winners of the 24<sup>th</sup> edition of innovation award competition "Crystal Mercury 2022".
